7/7/99

Dear Mr Jaffe,

I am writing to say that I support the petition to ban the forced molting of layer hens. The stress caused to the hens by forced molting, throws their systems into collapse, causing great stress and shock. The whole process is terribly cruel. Please ban the system.

In most things Great Britain is happy to follow the lead of the U.S.A. but in this case Britain is ahead in having banned the practice. We hope that the U.S.A will shortly follow the lead.

Yours faithfully

Joan Grantham,
